DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1, 4, 5, 8-13 and 16-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 6,164,494 to Marelli in view of US 3,655,952 to Johnson et al.

Marelli shows a liquid dosing dispenser with a device for counting dispensing doses, as seen in Figs. 1, having a fixed ratchet member 11, a trigger member 5 arranged to undergo reciprocal movement for actuation of the device, a counter 16 in the form of a ring arranged to undergo a counting movement and having a first region 18 for interaction with the trigger member and a second region 19 with multiple incline sections and teeth as seen in Figs. 5 and 6, a second counting ring 21 and an aerosol container 3 with a ferrule 4 for connecting the container to the counting device.

In reference to claims 10 and 11, the trigger has to be fully depressed for the counting ring to undergo rotation and to result in the device counting the actuation, see Figs. 5 and 6.

Marelli lacks the counter member in the form of a ring with teeth. Johnson show a liquid dosing dispenser as seen in Figs. 1 and 2, with a counter member 28 in the form of a ring with teeth 28. It would have been obvious to a person with ordinary skill in the art at the time the invention was made to substitute the counter ring of the device of Marelli with a toothed

counting ring to simplify and minimizing the number of elements for greater assurance that the member 28 will move as desired as taught by Johnson.

Response to Arguments

3. Applicant's arguments filed October 24, 2011 have been fully considered but they are not persuasive. In response to applicant's argument that the references fail to disclosed the counter member 16 being biased toward a ratchet member and a trigger member, the device of Marelli discloses a counter member 16 having flexible projecting members 19 biasing both the counter member 16 and the ratcheting element 12 against the trigger member 5, see Fig. 5, and column 3, lines 42-55.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
